Pacific Century Financial Corporation  
Notes to Consolidated Financial Statements  
(Unaudited)

Note 1. Basis of Presentation

The accompanying unaudited consolidated financial statements of Pacific Century Financial Corporation (Pacific Century) have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. In the opinion of management, the consolidated financial statements reflect all adjustments, which are necessary for a fair presentation of the results for the interim periods. These statements should be read in conjunction with the audited consolidated financial statements and related notes included in Pacific Century's 2000 Annual Report on Form 10-K. Operating results for the three months ended March 31, 2001 are not necessarily indicative of the results that may be expected for the year ending December 31, 2001.

The balance sheet at December 31, 2000 has been derived from the audited financial statements of Pacific Century at that date but does not include all of the information and footnotes required by generally accepted accounting principles in the United States for complete financial statements.

International operations include certain activities located domestically in Hawaii, as well as branches and subsidiaries domiciled outside the United States. The operations of Bank of Hawaii and First Savings and Loan Association of America located in the West and South Pacific that are denominated in U.S. dollars are classified as domestic. Pacific Century's international operations are primarily concentrated in Hong Kong, Japan, Singapore, South Korea, Taiwan, French Polynesia, Fiji, New Caledonia, Papua New Guinea and Vanuatu.

Regulatory Matters

Pacific Century continues to comply with the terms of the previously disclosed Memorandum of Understanding. Pacific Century has obtained regulatory approval for dividend payments for the first and second quarters of 2001.

## Note 2. Recent Accounting Pronouncements

On January 1, 2001 Pacific Century adopted Financial Accounting Standard No. 133, "Accounting for Derivative Instruments and Hedging Activities as amended by SFAS No. 137 and SFAS No. 138. SFAS No. 133 requires that all derivatives be recorded on the balance sheet at fair value. Changes in a derivative's fair value that do not qualify for hedge treatment, as well as the ineffective portion of a hedge, must be recognized currently in earnings. The transition adjustment at the time of adoption was a charge to income of \$412 thousand.

## Note 3. Earnings Per Share

For the three months ended March 31, 2001 and 2000, the weighted average shares for computing basic and diluted EPS are presented on the Consolidated Statement of Income. The dilutive effect of stock options was 1,404,429 and 196,396 shares for the three months ended March 31, 2001 and 2000, respectively.

## Note 4. Income Taxes

The provision for income taxes is computed by applying statutory federal, foreign, and state income tax rates to income before income taxes as reported in the Consolidated Statements of Income after adjusting for non-taxable items, principally from certain state tax adjustments, tax exempt interest income and bank owned life insurance income. The tax provision is also reduced by low income housing, foreign and investment tax credits.

## Note 5. Business Segments

Pacific Century is a financial services organization that has maintained a broad presence throughout the Pacific region. However, its presence will be changing over the remainder of the year. On April 23, 2001, management announced its intention to divest non-core holdings. Operations in Hawaii, the West Pacific, American Samoa and Japan will be retained as well as an office in Arizona for its leasing operations and technology support. Consequently, during the first quarter of 2001, Pacific Century realigned its business from geographic segments into the following segments: Retail Banking, Commercial Banking, Financial Services Group, Divestiture Businesses and Treasury and Other Corporate.

Business segment results are determined based on Pacific Century's internal financial management organizational structure. Pacific Century uses a variety of techniques to assign and transfer balance sheet and income statement amounts between business segments including allocations of common costs and capital. These techniques and accounting practices are not covered by accounting principles generally accepted in the United States. The Company is continuing to develop its business segment accounting practices and implemented changes in the first quarter 2001. Accordingly, the previously presented operating results for the quarter ended March 31, 2000 have been reclassified to be consistent with the quarter ended March 31, 2001. It is possible that accounting practices may be changed again in future periods. If this occurs, prior segment information may be restated.

The financial results for three months ended March 31, 2001 and 2000 are presented below for each of Pacific Century's principal market segments.

### Business Segment Selected Financial Information

## Note 6. Restructuring

During the first quarter 2001, Pacific Century incurred restructuring and related costs as follows.

(in millions)	
Foreign Currency Translation Losses	\$28.0
Unrecoverable Investments	6.1
Termination Costs	1.6
Unrealizable Deferred Tax Asset	5.0
Consulting Costs	0.6
Other	3.1
	-----
Total	\$44.4
	=====

Pacific Century expects to sell its operations in California and the South Pacific and to sell or close its Asian branches by the end of 2001. As a result of these divestitures, assets with no future benefit were written off at March 31, 2001.

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

### PERFORMANCE HIGHLIGHTS

Pacific Century Financial Corporation (Pacific Century) reported earnings for the three months ended March 31, 2001 of \$33.7 million down 15.3% from \$39.8 million reported in the same period of 2000. Both basic and diluted earnings per share were \$0.42 for the first quarter 2001 compared to \$0.50 in the first quarter 2000.

Earnings for the first quarter of 2001 included gains of \$75.4 million from the sale of the Pacific Century's credit card portfolio and \$20.9 million related to the sale of ownership interest in Star Systems, Inc.

Pacific Century's continuing emphasis on improving asset quality resulted in significant reduction of credit risk during the quarter. Non-performing assets (NPAs), exclusive of accruing loans past due 90 days or more, were \$119.5 million, down 34.7% from \$183.0 million reported at December 31, 2000 and \$136.4

reported at March 31, 2000. At March 31, 2001 the allowance for loan losses stood at \$199.8 million compared with \$246.2 million and \$195.4 million at year end and March 31, 2000, respectively. The ratio of the allowance to loans was 2.29%, 2.62% and 2.05% at the end of each of the respective periods.

In the first quarter of 2001, return on average assets (ROAA) and return on average equity (ROAE) were 0.99% and 10.42%, respectively, compared to 1.13% and 13.19% in the same 2000 quarter.

Total assets at March 31, 2001 stood at \$13.7 billion relative to \$14.0 billion at December 31, 2000 and \$14.3 billion at March 31, 2000. Year-over-year, loans declined by \$981.1 million and investment securities available for sale declined by \$147.1 million, offset by a \$185.8 million increase in interest-bearing deposits.

On April 23, 2001 Pacific Century announced its new strategic plan designed to maximize shareholder value by strengthening its Hawaii and West Pacific operations and divesting most other holdings. Pacific Century plans to divest or wind down its operations in California, the South Pacific and Asia. It will maintain its operations in Hawaii, the West Pacific, American Samoa, Japan and a leasing office in Arizona. As a consequence of the plan, Pacific Century recognized restructuring and related costs of \$44.4 million.

#### Forward-Looking Statements

This report contains forward-looking statements regarding Pacific Century's beliefs, estimates, projections and assumptions, which are provided to assist in the understanding of certain aspects of Pacific Century's anticipated future financial performance. Pacific Century cautions readers not to place undue reliance on any forward-looking statement. Forward-looking statements are subject to significant risks and uncertainties, many of which are beyond Pacific Century's control. Although Pacific Century believes that the assumptions underlying its forward-looking statements are reasonable, any assumption could prove to be inaccurate and actual results may differ from those contained in or implied by such forward-looking statements for a variety of reasons. Factors that might cause differences to occur include, but are not limited to, economic conditions in the markets Pacific Century serves including those in Hawaii, the U.S. Mainland, Asia and the South Pacific; shifts in interest rates; fluctuations in currencies of Asian Rim and South Pacific countries relative to the U.S. dollar; changes in credit quality; implementation of the restructuring plan may not be completed within the expected financial and time estimates; changes in applicable federal, state, and foreign income tax laws and regulatory and monetary policies; and increases in competitive pressures in the banking and financial services industry, particularly in connection with product delivery and pricing. Pacific Century does not undertake and specifically disclaims any obligation to update any forward-looking statements to reflect events or circumstances after the date of such statements.

## STATEMENT OF INCOME ANALYSIS

### Net Interest Income

Taxable-equivalent net interest income for the first quarter of 2001 was \$134.1 million, down \$5.7 million, or 4.1% from the comparable period in 2000. Adjusted for a lease residual revaluation recorded during the quarter, taxable-equivalent net interest income was \$136.5 million for the first quarter of 2001, down \$3.3 million, or 2.4% from the same period last year.

Pacific Century's net interest margin was 4.24%, a decrease of 6 basis points from the comparable period a year ago. Adjusted for the lease residual revaluation, the net interest margin increased 2 basis points to 4.32% from the first quarter of 2000. The yield on average earnings assets was 8.08% for the first quarter of 2001. Excluding the lease residual adjustment, the yield on average earnings assets was 8.16%, an increase of 26 basis points from the same period a year ago largely the result of higher prevailing market rates. The average cost of funds was 4.85% for the quarter, up from 4.44% reported in the first quarter 2000 - mainly due to changes in funding sources and changing interest rates. Presented in Table 3 are average balances, yields, and rates paid for the three months ended March 31, 2001, March 31, 2000 and December 31, 2000. The results for the full year 2000 are also presented.

## Provision for Loan Losses

The provision for loan losses was \$52.5 million in the first quarter 2001, up from \$13.5 million for the same quarter last year. For further information on credit quality, refer to the section on "Corporate Risk Profile - Credit Risk - Allowance for Loan Losses" in this report.

## Non-Interest Income

Non-interest income after excluding the unusual gains was \$59.2 million in the first quarter of 2001, compared to \$61.9 million in the first quarter 2000 after adjusting for unusual gains in that quarter. Exclusive of investment securities gains and nonrecurring gains reported in both quarters, non-interest income was down \$1.7 million in the March 2001 quarter over the same year ago period.

Asset management income for the first quarter of 2001 decreased to \$15.8 million, down 6.5% from the same quarter last year. The year-over-year decrease is primarily attributable to the declining market value of managed assets.

Service charges on deposit accounts for the March 2001 quarter totaled \$9.9 million, This 4.0% increase over the same quarter last year reflects higher fee structures implemented at the end of the first quarter of 2000.

Fees, exchange and other service charges were \$20.8 million in the first quarter of 2001, compared to \$21.6 million in the same 2000 quarter. This reduction reflects the scaleback in the letter of credit and exchange volumes.

Other operating income in first quarter 2001, was \$13.4 million compared to \$15.6 million in the first quarter 2000. The current quarter, included a \$3.3 million impairment loss on a partnership interest and the year ago quarter included a \$2 million gain on equity investments. After adjusting for the impairment loss in 2001 and the gain in 2000, other operating income increased by \$3.1 million in 2001.

Sales of investment securities during the three months ended March 31, 2000 resulted in net investment security gains of \$20.2 million, including a gain of \$20.9 million from the sale of a stock investment in ATM processor Star Systems, Inc. Adjusting for the Star Systems gain, Pacific Century reported a securities loss of \$0.7 million for the three months ended March 31, 2001 compared to gains of \$0.3 million in the prior year quarter.

## Non-Interest Expense

Total non-interest expense for the March 2001 quarter, excluding restructuring and related costs of \$44.4 million, was \$131.8 million, up 4.5% from \$126.1 million in the comparable quarter of 2000.

Salaries and pension and other employee benefits expense totaled \$62.2 million in the first quarter of 2001, unchanged from \$62.2 million in the same quarter last year.

Net occupancy and equipment expense in the March 2001 quarter was \$25.5 million, an increase of 6.7% from \$23.9 million for the same period in 2000. The increase was largely due to higher software and equipment maintenance costs incurred in 2001.

Other operating expense increased to \$39.1 million in the first quarter of 2001 from \$35.2 million for the same quarter in 2000. This increase was due to higher professional fees, fraud losses, losses on derivatives with the implementation of SFAS No. 133, increased recruiting costs, costs of a new mileage awards program, as well as increases in other categories offset by lower insurance costs, reduced ORE expense, and lower audit and examination costs.

## Income Tax Provision

Pacific Century's effective tax rate was 44.7% for the first quarter compared to 37.7% in the first quarter of 2000. The increase is attributable to higher state and foreign taxes and the write-off of \$5 million of foreign tax assets, with no tax benefit. Given the reduction in foreign operations, the tax provision increased due to Pacific Century's inability to fully utilize foreign taxes to reduce the U.S. tax.

BALANCE SHEET ANALYSIS

Loans

At March 31, 2001, loans outstanding, including loans held for sale, had declined to \$9.0 billion, from \$9.7 billion at year-end 2000 and \$9.8 billion at March 31, 2000. During the quarter, Pacific Century sold \$166.8 million of commercial loans, its \$209.3 million credit card portfolio, and \$105.4 million of loans were charged off. Additional decline is attributable to other planned risk reductions in the portfolio offset by a \$294.4 million increase in residential mortgages.

Table 4 presents the composition of the loan portfolio by major loan categories as of March 31, 2001, December 31, 2000 and March 31, 2000.

Investment Securities

Pacific Century's investment portfolio is managed to provide collateral for cash management needs, to meet strategic asset/liability positioning, and to provide both interest income and balance sheet liquidity. Available-for-sale securities at March 31, 2001 were \$2.4 billion down 4.7% from \$2.5 billion at year end and the same date last year. Securities held to maturity were \$656 million at March 31, 2001, declining from \$670 million at year-end 2000 and \$732 million a year ago. These decreases were largely due to maturities. Other short-term interest earning assets totaled \$496 million at the end of the first quarter, compared to \$323 million and \$268 million at December 31, 2000 and March 31, 2000, respectively. The increase occurred as Pacific Century increased its liquidity.

## Deposits

As of March 31, 2001, deposits totaled \$8.8 billion, down from \$9.1 billion at both year-end and March 31, 2000. Year-over-year, domestic deposits reflected an increase of \$42 million, while foreign deposits declined by \$397 million. The decline in foreign deposits is largely in the other savings and time, which decreased \$347 million year-over-year and is attributed to foreign currency exchange rate fluctuations in the South Pacific and a decline in funding needed for foreign loans.

Table 6 presents average deposits by type for the first quarters of 2001 and 2000 and the full year 2000.

## Borrowings

Short-term borrowings, including funds purchased and securities sold under agreements to repurchase, totaled \$2.3 billion at March 31, 2001, \$2.3 billion at year-end 2000 and \$2.7 billion at March 31, 2000. The decline reflects the lower funding needs resulting from a decrease in outstanding assets.

Long-term debt on March 31, 2001 decreased to \$883 million from \$997 million at year-end 2000, but had increased from \$806 million at March 31, 2000 due to changing funding strategies.

## LINE OF BUSINESS FINANCIAL REVIEW

Beginning in December of 2000 and extending to the end of the first quarter, Pacific Century performed an analytically rigorous self-assessment of all of its lines of business. The fundamental objective was to develop a plan to improve shareholder value. Management evaluated the attractiveness of each of the company's markets, as well as the ability to compete in those markets in the future. Each business's performance was assessed in relation to the risks assumed and whether returns were generated that exceeded the cost of the capital allocated to them. It was concluded that three businesses: Pacific Century Bank; the Asia Division, and the South Pacific Division, excluding American Samoa did not achieve sufficient returns to create shareholder value and therefore, would be divested or liquidated.

A new organizational structure was announced in April as a result of the assessment process. Businesses have been aligned into the following units: Retail Banking, Commercial Banking, Financial Services, Divestiture Businesses, and Treasury and Other Corporate. The Line of Business Financial Review in this report is presented in a format that is consistent with the new organization structure which is different from previous quarters. Note 5 to the Consolidated Financial Statements includes Pacific Century's business segment financial reports for the three months ended March 31, 2001 and 2000.

Pacific Century measures performance of its businesses from multiple perspectives. Key measures are:

- Risk Adjusted Return on Capital (RAROC) - This method allocates equity to business units based on various risk factors, including credit, country, market/interest rate, and business/operating risks that are inherent in the operation of each business.
- Net Income After Capital Charge (NIACC) - This method of measuring performance reflects net income available to common shareholders less a charge to the unit for the cost

of capital allocated to it. The capital charge is based on the estimated rate of return expected by the financial markets for companies with risk levels similar to Pacific Century.

The determination of NIACC and RAROC uses an economic loan loss provision as a proxy for the actual results. The economic provision reflects the expected normalized loss determined by a statistically applied approach that considers risk factors, including historical loss experience, within a given portfolio.

## Retail Banking

Pacific Century's retail banking franchise and market share in Hawaii and American Samoa are key strengths of the company. Retail Banking provides checking and savings services, small business, merchant services, installment, home equity and mortgage lending as well as other services. First Quarter 2001 results in Retail Banking showed improvement in revenues largely from increased mortgage banking activities and an increase in ATM and service charge fees.

## Commercial Banking

The Commercial Banking segment offers corporate banking, and commercial products, leasing and commercial real estate lending and auto finance. Pacific Century's West Pacific operations are included in this segment. The income decline in commercial banking is largely the result of losses recognized due to Pacific Century's effort to improve its credit quality.

## Financial Services Group

The Financial Services Group offers private banking, trust services, asset management, investments such as mutual funds and stocks, financial planning, and insurance. A significant portion of this segment's income is derived from fees which are based on the market values of assets under management. Such revenues declined in the first quarter compared to the prior year quarter due to the general decline in the stock market during the first quarter.

## Divestiture Businesses

This segment includes all of the businesses Pacific Century will divest or close. Pacific Century expects to complete the divestitures and closures by December 31, 2001.

## Treasury and Other Corporate

The primary operations in this segment is Treasury, which consists of corporate asset and liability management activities including investment securities, federal funds purchased and sold, government deposits, short and long-term borrowings, and derivative activities for managing interest rate and foreign currency risks. Additionally, the net residual effect of transfer pricing assets and liabilities is included in Treasury, as is any corporate-wide interest rate risk and other reconciling differences.

In the first quarter of 2001, this segment was allocated gains from the sale of the credit card portfolio and Star Systems totaling \$96.3 million and restructuring and related costs of \$44.4 million associated with the planned divestitures and closures.

Economic NIACC and RAROC for each segment for the first quarters of 2001 and 2000 are presented below.

Economic NIACC and RAROC  
Table 7  
(in thousands of dollars)

	RETAIL	COMMERCIAL	FINANCIAL SERVICES GROUP	DIVESTITURE BUSINESSES	TREASURY AND OTHER CORPORATE	CONSOLIDATED TOTAL
Three Months Ended March 31, 2001

--------------------------------	---------	---------	--------	---------	---------	-----------

## FOREIGN OPERATIONS

Pacific Century maintains an international presence in the Asia-Pacific region that provides lending, correspondent banking, foreign exchange, trade finance and deposit gathering activities in these markets. Pacific Century divides its international business into three areas: the West Pacific, the South Pacific and Asia.

The West Pacific includes Bank of Hawaii branches in Guam and in other locations in the West Pacific region. First Federal Savings and Loan of America also operates branches in Guam. Since the U.S. dollar is used in these locations, operations in the West Pacific are not considered foreign for financial reporting purposes.

The South Pacific consists of investments in subsidiary banks in French Polynesia, New Caledonia, Papua New Guinea, Vanuatu, and Bank of Hawaii branch operations in Fiji and American Samoa. As American Samoa is U.S. dollar based, its operation is included as domestic for financial reporting purposes. Pacific Century also has investments in the National Bank of the Solomon Islands and the Bank of Queensland. As a result of the recent strategic assessment it has been decided to divest the entire South Pacific Division, excluding American Samoa, which will be integrated into and managed as part of the Hawaii Retail Business. This exit is anticipated to be complete by the end of 2001.

Through its Asia Division, Pacific Century provides banking services to corporate and financial institution customers in six Asian locations with support from its New York and Honolulu operations. As a result of the recent strategic assessment it has been decided to divest the entire Asia Division, although a representative office will be maintained in Japan, which has extensive ties to businesses in Hawaii and the West Pacific. This exit is also anticipated to largely be complete by the end of 2001.

The countries in which Pacific Century maintains its largest credit exposure on a cross-border basis include Japan, South Korea and France. Table 8 presents as of March 31, 2001, December 31, 2000, and March 31, 2000 a geographic distribution of Pacific Century's cross-border assets for each country in which such assets exceed 0.75% of total assets.

### Geographic Distribution of Cross-Border International Assets (1)

Table 8  
(in millions)

Country	March 31, 2001	December 31, 2000	March 31, 2000
Japan	\$222.0	\$298.8	\$316.2
South Korea	246.7	282.0	305.6
France	97.8	85.8	147.8
All Others	596.4	423.8	549.4
	=====	=====	=====
	\$1,162.9	\$1,090.4	\$1,319.0

- (1) In this table, cross-border outstandings are defined as foreign monetary assets that are payable to Pacific Century in U.S. dollars or other non-local currencies, plus amounts payable in local currency but funded with U.S. dollars or other non-local currencies. Cross-border outstandings include loans, acceptances, interest-bearing deposits with other banks, other interest-bearing investments, and other monetary assets.

## CORPORATE RISK PROFILE

### Credit Risk

## Non-Performing Assets and Past Due Loans

Non-performing assets (NPAs) consist of non-accrual loans, restructured loans and foreclosed real estate. Total non-performing assets decreased to \$119.5 million, or 1.33% of total loans at March 31, 2001 down \$63.5 million, or 35% from non-performing assets of \$183.0 million, or 1.89% of total loans at December 31, 2000 and down from \$136.4, or 1.39% of loans at March 31, 2000.

The decrease in domestic non-performing assets is largely due to loan sales and charge-off activity as management made significant progress on its commitment to improve asset quality. Charge-offs and exchange rate valuations primarily drove the decrease in foreign non-performing assets. Total non-performing assets are currently at the lowest level since 1998.

Foreclosed real estate totaled \$11.2 million, up \$6.7 million from year-end 2000 due to the acquisition of two large properties and several other smaller properties located in Hawaii totaling \$9.7 million. This is offset by \$3.0 million in sales during the quarter.

Impaired loans at March 31, 2001 were at \$123.2 million compared to \$221.0 million at year end 2000. There were no restructured loans as of March 31, 2001, December 31, 2000 and March 31, 2000.

Accruing loans past due 90 days or more were \$11.1 million at March 31, 2001, down from \$18.8 at year-end 2000 and \$23.1 at March 31, 2000.

For further information concerning non-performing assets and past due loans, please refer to Table 9.

Allowance for Loan Losses

The allowance for loan losses at March 31, 2001 was \$199.8 million, or 2.29% of total loans outstanding, compared with \$246.2 million, or 2.62% at December 31, 2000 and \$195.4 million, or 2.05% at March 31, 2000. The ratio of the allowance to net loans was 2.43% at March 31, 2001. The ratio of allowance to total non-performing assets increased to 167% at March 31, 2001, up from 117% at December 31, 2000 and up from 143% at March 31, 2000. A summary of the activity in the allowance for loan losses is presented in table 10.

Loan loss provisions were \$52.5 million for the first quarter 2001, increased \$13.5 million for the same quarter last year. Charge-offs during the quarter of \$105.4 million were partially offset by loan loss recoveries of \$7.7 million. Two thirds of the losses were due to the syndicated loan portfolio, as non-performing loans were sold or charged off. Seven other higher risk, but performing, syndicated loans with outstanding balances of \$134 million and two additional undrawn commitments totaling \$43 million were sold during the quarter as part of the continuing effort to reduce credit risk.

#### Market Risk

At Pacific Century, assets and liabilities are managed to maximize long term risk adjusted returns to shareholders. Pacific Century's asset and liability management process involves measuring, monitoring, controlling and managing financial risks that can significantly impact Pacific Century's financial position and operating results. Financial risks in the form of interest rate sensitivity, foreign currency exchange fluctuations, liquidity, and capital adequacy are balanced with expected returns with the objective to maximize earnings performance and shareholder value, while limiting the volatility of each.

The activities associated with these financial risks are categorized into "other than trading" or "trading."

#### Other Than Trading Activities

A key element in Pacific Century's ongoing process to measure and monitor interest rate risk is the utilization of a net interest income (NII) simulation model. This model is used to estimate the amount that NII will change over a one-year time horizon under various interest rate scenarios using numerous assumptions, which management believes are reasonable. The NII simulation model captures the dynamic nature of the balance sheet and provides a sophisticated estimate rather than a precise prediction of NII's exposure to higher or lower interest rates.

Table 11 presents, as of March 31, 2001, December 31, 2000 and March 31, 2000, the estimate of the change in NII from a gradual 200 basis point increase or decrease in interest rates, moving in parallel fashion over the entire yield curve, over the next 12-month period relative to the measured base case scenario for NII. The resulting estimate in NII exposure is well within the approved Asset Liability Management Committee guidelines and presents a balance sheet exposure that is slightly liability sensitive. A liability sensitive exposure would imply a favorable short-term impact on NII in periods of decreasing interest rates.

#### Market Risk Exposure to Interest Rate Changes

-----  
Table 11

	March 31, 2001		December 31, 2000		March 31, 2000	
	Interest Rate Change (in basis points)		Interest Rate Change (in basis points)		Interest Rate Change (in basis points)	
	-200	+200	-200	+200	-200	+200
Estimated Exposure as a Percent of Net Interest Income	(1.3)%	(0.6)%	(2.3)%	0.5%	0.6%	(2.2)%

To enhance and complement the results from the NII simulation model, Pacific Century also reviews other measures of interest rate risk. These measures include the sensitivity of market value of equity and the exposure to basis risk and non-parallel yield curve shifts. There are some inherent limitations to these measures, but used along with the NII simulation model, Pacific Century gains a better overall insight for managing its exposure to changes in interest rates.

In managing interest rate risk, Pacific Century relies primarily on the balance sheet, to manage its risk position. Approaches that are used to shift balance sheet mix or alter the interest rate characteristics of assets and liabilities primarily include changing product pricing strategies and modifying investment portfolio strategies. The use of financial derivatives has been limited over the past several years.

Pacific Century's broad area of operations throughout the South Pacific and Asia has the potential to expose it to foreign currency risk. In general, however, most foreign currency denominated

assets are funded by like currency liabilities, with imbalances corrected through the use of various hedge instruments. By policy, the net exposure in those balance sheet activities described above is insignificant.

On the other hand, Pacific Century is exposed to foreign currency exchange rate changes from the capital invested in its foreign subsidiaries and branches located throughout the South Pacific and Asian Rim. These investments are designed to diversify Pacific Century's total balance sheet exposure. A portion of the capital investment in French Polynesia and New Caledonia is offset by a borrowing denominated in euro and a foreign exchange currency hedge transaction. In the first quarter of 2001, Pacific Century recognized in income losses of \$28.0 million arising from foreign currency translation losses that could not be hedged. These losses were previously included in other comprehensive income. As of March 31, 2001 the remainder of these capital investments which aggregated \$56.5 million, was not hedged. The comparative unhedged position at year-end 2000 was \$71.2 million and \$90.4 million at March 31, 2000. The increased provision and charge-off of loans in the South Pacific and Asia has created situations where liabilities exceeded assets as of March 31, 2001. This anomaly results in the negative equity reported in Table 12 for the other currency category.

To estimate the potential loss from foreign currency exposure, Pacific Century uses a value-at-risk (VAR) calculation. For net investments in subsidiaries, Pacific Century's VAR is calculated at a 95% confidence interval.

Table 12 presents as of March 31, 2001, December 31, 2000 and March 31, 2000 Pacific Century's foreign currency exposure from its net investment in subsidiaries and branch operations that are denominated in a foreign currency as measured by the VAR.

#### Market Risk Exposure From Changes in Foreign Exchange Rates Table 12

(in millions of dollars)	March 31, 2001		December 31, 2000		March 31, 2000	
	Book Value	Value-at-Risk	Book Value	Value-at-Risk	Book Value	Value-at-Risk
Net Investments in Foreign						

Subsidiaries & Branches

	-----	-----	-----	-----	-----	-----
Total	\$56.5	\$26.2	\$71.2	\$27.1	\$90.4	\$29.6
	=====	=====	=====	=====	=====	=====

(1) Net of \$34 million, \$37 million and \$37 million borrowing at March 31, 2001, December 31, 2000 and March 31, 2000, respectively, denominated in euro and foreign exchange hedge transactions of \$24 million, \$26 million and \$22 million at March 31, 2001, December 31, 2000 and March 31, 2000.

#### Trading Activities

Trading activities include foreign currency and foreign exchange contracts that expose Pacific Century to a minor degree of foreign currency risk. Pacific Century manages its trading account such that it does not maintain significant foreign currency open positions. The exposure from foreign currency trading activities positions measured by VAR methodology as of March 31, 2001 continues to be immaterial.

#### Liquidity Management

Liquidity is managed to ensure that Pacific Century has continuous access to sufficient, reasonably priced funding to conduct its business in a normal manner. Pacific Century's liquidity management process is described in the 2000 Annual Report to Shareholders.

Pacific Century maintained a \$25 million annually renewable line of credit for working capital purposes. Fees are paid on the unused balance of the line. During the first quarter of 2001, the line was not drawn upon.

Bank of Hawaii and First Savings are both members of the Federal Home Loan Bank of Seattle. The FHLB provides these institutions with an additional source for short and long-term funding. Borrowings from the FHLB ended the first quarter of 2001 at \$506 million, compared to \$520 million at year-end 2000 and \$487 million at March 31, 2000.

Additionally, Bank of Hawaii maintains a \$1 billion senior and subordinated bank note program. Under this facility, Bank of Hawaii may issue additional notes provided that at any time the aggregate amount outstanding does not exceed \$1 billion. At March 31, 2001 there was \$125 million issued and outstanding under this program.

#### Capital Management

Pacific Century manages its capital level to optimize shareholder value, support asset growth, provide protection against unforeseen losses and comply with regulatory requirements. Capital levels are reviewed periodically relative to Pacific Century's risk profile and current and projected economic conditions. Pacific Century's objective is to hold sufficient capital on a regulatory basis to exceed the minimum guidelines of a well capitalized institution.

At March 31, 2001, Pacific Century's shareholders' equity grew to \$1.37 billion, an increase of 11.9% over the same date in 2000. The growth in shareholders' equity during the first three months of 2001 included retention of earnings, net unrealized valuation adjustments, realized foreign currency translation losses, and issuance of common stock under various stock-based plans. Offsetting these increases were cash dividends paid. The positive unrealized valuation adjustment primarily is attributed to market value adjustments for available-for-sale investment securities due to the general decline in market interest rates.

Pacific Century's regulatory capital ratios exceeded the minimum threshold levels that were established by federal bank regulators to qualify an institution as well capitalized. The minimum regulatory standards to qualify as

well capitalized are as follows: Tier 1 Capital 6%; Total Capital 10%; and the Leverage Ratio 5%. Table 13 presents the activities and balances in Pacific Century's capital accounts along with key capital ratios.

Equity Capital  
Table 13

(1) Includes common stock issued under the profit sharing and stock option plans and unrealized valuation adjustments for investment securities, foreign currency translation, pension liability, and stock compensation.

## Part II. - Other Information

Items 1 to 3 and Item 5 omitted pursuant to instructions.

### Item 4 - Submission of Matters to a Vote of Shareholders

At the annual shareholders meeting held on April 27, 2001, the following matters were submitted to a vote of the shareholders.

- a. Election of Directors - Three directors whose terms in office were expiring as well as one new director nominee were elected to the Board of Directors as follows:

Mary G. Bitterman  
Martin A. Stein  
Stanley S. Takahashi  
Clinton R. Churchill

- b. Amendment to the Stock Option Plan to Increase Available Shares - The amendment to the plan increased the maximum shares of common stock that may be issued under the Plan by 5,000,000 to 14,650,000.

- c. Amendment to the Stock Option Plan to Allow the Number of Options Granted to Exceed 20% for CEO Upon Hire - The amendment permitted the Company to follow a separate maximum limitation equal to 23% of the total authorized pool of shares as it relates to the number of options granted to the Chief Executive Officer at the time of hire.

- d. Amendment to the Option Plan to Allow the Grant of Options to Independent

Contractors - The Amendment would allow the Company to grant awards to independent contractors providing services to the Company or a subsidiary.

Each of the matters before the Shareholders was approved by a substantial margin.
